

In the MERCURY'S Opinion

The Big Lie Technique

"The Jews are the most remarkable people in human history," said Nietzsche in *The Antichrist*, "because, whenever they have been faced with the question, 'to be or not to be,' they have always decided, with an uncanny insight, to be at any price: even if that price was the radical falsification of human nature, naturalness, reality and the entire inner world as well as the external world. . . . Out of their own consciousness they have evolved a set of ideas in opposition to all natural conditions of living—one by one they have taken religion, culture, morality, history and psychology and converted them irreparably into a contradiction of their natural meaning. . . . Because of their capacity for distortion, the Jews . . . have hoodwinked mankind . . ."

So it is that for millenia the Jews have twisted history to serve their own ends. No other people is remotely as history-conscious as the Jews. With this one exception, the Jews, all races and peoples, be they northern European, southern European, Russian, Chinese, Mexican or any other, take their knocks through the generations and in fifty years it is forgotten, but not the Jews—they are the world's past masters in public relations, propaganda and the manipulation of their enemies by images which they, themselves create. Their enemies, by the way, they define as everyone else in the world—the "Gentiles"—a word which the gentiles themselves have picked up and made holy so that they may reserve for the Jews their proper niche as "God's Chosen" master race. No wonder the Jews contemptuously call gentiles "goyim," or cattle. "Salvation is of the Jews," sneers Nietzsche, condemning not the Jews but the stupid cattle.

Should a Jew in Belgrade be insulted, the incident will promptly find its way into the Talmud—the Jewish "holy book"—so that Jews everywhere may rend their garments, gnash their teeth, drip their tears on the Wailing Wall and cry for vengeance forever after.

The defeat of the White South was a terrible event. The atrocities visited upon the South by the power-crazed northern Republicans consisted of multiple murders too numerous to count, rapes, beatings, starvation, torture and the wiping out of fortunes, estates and whole families.* Yet today this is all forgotten. The White South lost the war, took the consequences, rebuilt itself (without foreign aid) and tried to forget it. Few are the southerners today who bear the ancient grudge.

The defeat of Germany in two world wars is the same, only worse. The British blockade of Germany *after* the first world war (in gross violation of the armistice) resulted in the murder by slow starvation of almost a million Germans. The even worse horrors that followed the unconditional surrender of Germany in 1945 beggar description. Yet today, only a few Germans remember. They do not spend their time hating their persecutors and demanding the tearful sympathy and the money of all lesser races; no, they have literally rebuilt their country, their cathedrals, whole cities from the ground up—a feat that is surely one of the most remarkable reconstructions in all history.

**The Bondage of the Free*, by Kent H. Steffgen, vividly covers some of the excesses visited on the South after Civil War. \$1 from *The American Mercury*.

Meanwhile, they have paid billions of dollars to Jews as "reparations" for their crime of temporarily breaking free of Jewish slavery.

Perhaps you can dimly imagine what your history books would have said about the Civil War if the South had been inhabited by God's Chosen Ones rather than mere goyim (Yiddish for gentile, or cattle). By today Reconstruction would be the central event of the ages, the greatest crime ever visited upon mankind by Yankee devils incarnate. The epochal horror of Reconstruction would have grown from year to year as each Jewish generation would outdo the former to remember more of the terrible events.

Today, the central historical event of our world is the alleged "extermination" of six million Jews. This obscene lie literally grows from year to year. No objective historian can verify this lie; everyone who has studied the facts knows that no such event happened. Yet it has become the greatest feat of propaganda since the parasitic Jews were thrown out of Egypt by a population which had become disgusted by them—as all populations eventually do. They wrote that up as a great and miraculous exodus, and even had the Red Sea part so they could march across!

The "Holocaust" nonsense a few years later has meant not only hundreds of billions of dollars for the bandit state of Israel and to uncounted thousands or millions of Jews who "escaped the gas chambers," it has literally conferred an omnipotent power of intimidation against anyone who begins to understand their deviltry and dares to stand athwart Jewish ambition.

The Jews have even stolen another good word out of our language and made it into their tool. You may look in all of the dictionaries published prior to a year ago and the word, "holocaust" has never before described the myth of the six million. But this will not be so in the future. From now on the word will mean something entirely different—in actual fact, an event that never happened. The ADL will see to it that all dictionary publishers will insert the new definition immediately.

A good propagandist knows that if you wish to create something that does not exist, you should give it a name. Once the name exists, the subject it defines must necessarily also exist, for how could there be a name without what it names? Remember Harvey, the invisible rabbit?

"The goal is to make study of the Holocaust an integral part of secondary school curricula here and abroad," said Nat Kameny, one of the ADL's speakers at a 3-day conference set up by the organization to kick off its growing "Holocaust" celebration. The ADL, through its new "Holocaust Information Center," has—needless to say—already secured the support of the federal government for its plans to have your tax money used to brainwash, your kids, their children and great grandchildren with the Big Lie.

The ADL recognizes the difficulty of the task. Said Henry Friedlander to the conference (introduced as a "survivor of Nazi concentration camps"): "This attempt to use the Holocaust to illuminate the concerns of our age poses problems because it means that the Holocaust has become an accepted historical topic and as such must also become a subject of legitimate public debate and scholarly controversy . . . I do not mean crackpots and sensationalists; those one must simply disregard."

In other words, Friedlander is saying: "In our promotion of this Big Lie we Jews have to be careful. To put it over we must maintain the pretense of scholarship and objectivity. We will permit debate on small questions but we have to be sure not to permit anyone who doesn't basically accept the Big Lie to be heard. Only those who do can be permitted to get publicity or the whole scheme will backfire."

Yes, Nietzsche saw the Jew clearly and, were he alive today, would watch the creation of an historical "fact" out of the whole cloth of paranoid Jewish hot air with great amusement.
